- Framer
- ChatGPT, Claude
- CRM (Salesforce, Oracle Siebel)
- Microsoft 365

Education

- 2026
 - Advanced Framer Studies
 - Flux Academy
- 2022 - 2024
 - Graphic Design, specializing in UX/UI & Interactive Product Design
 - HIT – Holon Institute of Technology

Military Service

- 2016 - 2018
 - Physical Training Instructor, IDF

Languages

English - (Fluent)
Hebrew - (Native)

About Me

UX/UI Designer with hands-on experience leading the end-to-end design of a web MVP at an early-stage startup, built to validate an invoice-scanning product. Worked as the sole designer across product definition, user flows, high-fidelity UI, design systems, and developer handoff. Brings a strong product and UX mindset, with a focus on translating complex requirements and user needs into clear, efficient experiences and feature-driven solutions. Combines structured problem-solving with AI-assisted workflows to improve efficiency and speed up iteration, alongside experience with generative tools, prompt writing, and no-code platforms.

Experience

- 2025 - 2026

UX/UI Designer

Nemesh

- Led the end-to-end UX/UI design of a web MVP created to validate the company's invoice-scanning technology.
- Worked as the sole UX/UI designer, leading early-stage research, MVP definition, user flows, wireframes, high-fidelity UI, and developer handoff.
- Collaborated with the founder and backend engineer to translate technical capabilities into a clear and efficient workflow for upload, review, correction, validation, and saving.
- Designed UX solutions that improved speed and accuracy, including a visual linking mechanism between flagged errors, the relevant form fields, and the exact source on the invoice for faster correction.
- Built a scalable design system in Figma with tokens, variables, components, interface rules, and handoff specifications to support consistency and accurate implementation.
- Defined end-to-end feedback patterns across the MVP, including validation states, error and warning banners, error toasts, and success states.
- Contributed to the company's early brand foundation through logo design and copywriting for the company's marketing website, and independently learned Framer to help reduce future development costs.

- 2023 - 2024

Operation Control Center Coordinator

Bar Group LTD

- Coordinated real-time dispatch, deliveries, and day-to-day logistics operations in a fast-paced distribution environment.
- Managed a complex Excel-based operational report alongside internal company systems, updating live delivery data throughout the day.
- Strategically assigned a limited number of drivers each day based on geographic proximity, regional demand, manager locations, and supply needs to ensure efficient distribution.
- Worked directly with regional managers across the country to prioritize delivery requirements and direct drivers according to operational needs.

- 2021 - 2023

Mortgage Service & Sales Representative

Phoenix Insurance

- Managed mortgage and home insurance policy updates for customers.
- Worked with banks, customers, and internal systems to ensure accurate document and policy handling.
- Supported service, sales, and processes in a fast-paced, detail-oriented environment.
- Ensured all interactions and documentation complied with regulatory and internal policy standards.
- Resolved customer issues professionally while maintaining high service standards and client satisfaction.
